Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/24/2005 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 9, 11 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Hoar et al (2002/0147651).

Hoar et al show receiving at a web server a request for an item from an online shopper; determining via the server an approximate quantity of the item available for purchase by the online shopper; adjusting the quantity responsive to a quantity held estimate of a number of units of the item held by in person shoppers who physically removed the units of the item from inventory (see e.g., pars. 0053-0055) to provide an

adjusted quantity; comparing the adjusted quantity with a first threshold; and when the adjusted quantity is less than the first threshold invoking a corrective action (e.g., stating that the customer should check with the store regarding stock).

As to claim 2, it is noted that Hoar et al show basing the quantity held estimate on an average number purchased historically (see e.g., par. 0054).

As to claims 3, it is noted that Hoar et al show using time of day.

As to claim 9, it is noted that since Hoar et al monitors the approximate quantity in the nominal situation and does not stop monitoring it during the step of invoking, the invoking step includes monitoring the approximate quantity. It is further noted that when the approximate quantity falls below a second threshold, the on-line shopper is informed (he is told that item is out of stock).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoar et al.

As to claim 4, Hoar et al show all elements except that the quantity held estimate is based on day of the week. However, it is notoriously old and well known in the art to

Art Unit: 3627

vary purchase forecasts based on day of the week. It would have been obvious to one of ordinary skill in the art to modify the method of Hoar et al by basing the estimate on day of the week in order to more accurately capture likely shopping patterns.

As to claim 5, Hoar et al show all elements except that the quantity held estimate is dependent on proximity to a holiday. However, it is notoriously old and well known in the art to vary purchase forecasts based on proximity to a holiday. It would have been obvious to one of ordinary skill in the art to modify the method of Hoar et al by basing the estimate on the proximity to a holiday in order to more accurately capture likely shopping patterns.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
